BERLONIA

Modern living and working should give us simplicity and ease, which is made possible by innovative technology in the first place.

The harmony between technology and design creates an exceptional way of a sophisticated lifestyle.

Berlonia is making living interiors comfortable and smart, lighting cosy and elegant, music rich and timeless.

SMART LIVING

SMART LIVING

Just imagine: Room lights and free definable light scenes that adapt to your needs; heating and cooling systems that regulate themselves automatically and thus help to save energy; a dynamic blind control system that adapts to the changing path of the sun and keeps the desired indoor climate of your living environment constant; a house that simulates your presence even when you are not there; your music that you can enjoy in all the rooms of your choice; and all intuitively controllable via the smartphone in your hand or with the sound of your voice.

LIGHT DESIGN

LIGHTDESIGN

Finding the perfect balance between accentuation, mood and function is the greatest challenge when developing a holistic lighting concept.

Making light an essential part of the architecture and give the room a very special charm with unusual shapes and timeless design - is my passion.

You have come to the right place if you are looking for creative, smart and innovative lighting solutions. I will support you from the start to the end of realization our project.

MEDIA SOLUTIONS

MULTIMEDIA

How would you like it to wake up with your favorite music in the morning, listening to your favorite playlist when you get home or simply enjoying your music in all rooms? I love multiroom audio.

Perhaps you are planning your new home theater or looking for innovative solutions for your conference and presentation rooms? From professional audio equipment to large video walls, I will create the perfect solutions to suit your preferences.

CONSULT

Do you need support for your upcoming project? Are you still missing detailed information to initiate the next steps of your project? Or do you need ideas for alternative solutions?

For me, consulting starts where you need support. By asking specific questions and listening closely, I get a comprehensive picture of your wishes and ideas to develop a suitable concept for you.

With advancing technical development, the requirements for diligent and consistent planning are also growing. Only holistic and in-depth planning guarantees an appropriate product selection and an optimal interaction of the various components, services and functions. For us as your planner, this means constantly observing the market and developments to keep up to date.

Careful planning is the basis for a successful project.

CONCEPT

INTEGRATE

Are you a house owning client, an architect, a building contractor or a master craftsman? Do you manage a store or catering business? Are you responsible for technology in a university or school, a kindergarten or retirement home, a library or a public institution?

As a qualified system integrator, I will work with you to turn your plans into reality. My many years of professional experience in the fields of building automation, lighting design, media control and studio technology guarantee you reliable and successful implementation across the board.

THE MORE UNIQUE
THE IDEA,

THE MORE
INDIVIDUAL THE
SOLUTION.

SMART VISIONS

My vision is to make this world a little more comfortable, easier and even more secure. Advancing technology provides us with the opportunity to fulfill this vision and redefine our way of living.

As your expert for system integration, I create holistic solutions for professional smart homes, architectural lighting concepts and sophisticated multimedia applications.

I'm providing the full range of services from consulting and planning to integration.

Let's have a look on your project.

Marc M. Lauterbach

My mission is to design complete, intelligent and uncompromising solutions. In order to meet these high standards, I rely on selected brands and competent partners.
